Mr. Wells,  
Please find the answer to your question submitted June 11, 2019.

How can Target Trucking legally allow the crushing of concrete at the Bohne Road facility? My research does not indicate any licensing or permit that allows concrete crushing there.

GLCT: The 2014 Special Use Permit did not address "crushing concrete". The Planning Commission discussed the issue however the activity was never approved or denied in any documents or meeting minutes.

The issue of crushing concrete is being discussed in relation to the current SUP among the planner and the Planning Commission along with the other operating conditions. No decision on whether the SUP will allow crushing concrete has been made yet.
